**Discussion**

**White Willow Bark (Salix alba)** Willow bark has been used for thousands of years to help support eicosanoid and cytokine balance and to help relieve discomfort.[1-3] Willow bark is currently approved by the German Commission E and the European Scientific Cooperative on Phytotherapy (ESCOP) for these purposes. Willow bark is also recognized in the United States for its role in supporting joint comfort.[1]

Willow bark contains glycosides, salicylates, flavonoids, tannins, aromatic compounds, and acids. A 2007 Cochrane review of the literature found moderate evidence that *Salix alba* positively affected eicosanoid metabolism and produced results that were comparable to those obtained by other commonly used compounds. Favorable results were obtained when the *Salix alba* in the studies was standardized to 120 mg or 240 mg salicin. BOSWELLIA PLUS provides a standardized 120 mg dose of salicin per serving.*[4]

Various randomized placebo-controlled studies suggest that willow bark produces positive effects on joint discomfort. The usual dose of salicin is 240 mg per day,[5] which is the intake recommendation for BOSWELLIA PLUS. Pharmacokinetic evaluations reveal that salicylic acid is the major metabolite of salicin, though other components of willow bark are believed to provide relief as well.[6] The mechanism of action of white willow bark appears to involve an effect on both arachidonic acid-derived eicosanoids and cytokine compounds.*[7]

**5•Loxin®**, a standardized *Boswellia serrata* extract enriched to 30% 3-O-acetyl-11-keto-ß-boswellic acid (AKBA), is ten times more concentrated than ordinary *B. serrata*. *Boswellia serrata* is an ayurvedic herb whose principle constituents—boswellic acid and alpha-boswellic acid—may help maintain healthy leukotriene metabolism by reducing the activity of the enzyme 5-lipoxygenase.[8] 5-lipoxygenase (5-LOX) catalyzes the synthesis of unfavorable leukotrienes.*[9]

A randomized, double-blind, placebo-controlled trial assessing the efficacy, safety, and tolerability of *Boswellia* extract produced statistically significant and clinically relevant decreases in knee discomfort, increases in knee flexion, and increases in walking distance.[10] A randomized, double-blind, placebo-controlled study specifically designed with 5•Loxin resulted in statistically significant improvements in comfort and physical function and a significant reduction in matrix metalloproteinase (MMP) in synovial fluid.[11] MMP represents a class of enzymes that selectively hydrolyze peptide bonds and degrade structural proteins; they play a crucial role in the degradation of joint tissues. 5•Loxin shows significant inhibition against several MMPs. It helps prevent the formation of human recombinant TNF-α inducible MMPs, which further facilitates the maintenance of healthy cartilage and cell-cycle regulation.*[11,12]

**BerryVin™ (40 mg)** contains a blend of blueberries, strawberries, escobilo, and cranberries, along with grape and pomegranate extracts. This bioflavonoid-rich berry powder provides polyphenols, anthocyanins, ellagic acid, and an antioxidant capacity of 4000 TE/g to fight free radicals. It may also provide substantial antioxidant support for soft tissues. Bioflavonoids are thought to act synergistically to inhibit cyclooxygenases, lipoxigenases, and phospholipases, ultimately supporting healthy eicosanoid metabolism and favorable cytokine balance.*[13,14]

*BOSWELLIA PLUS is formulated to support the body’s normal response to inflammation and provide relief for joint discomfort. 5-LOXIN®, a patented Boswellia extract yielding concentrated 3-O-acetyl-11-keto-β-boswellic acid (AKBA), is found to inhibit the 5-lipoxygenase enzyme. Salicin from white willow bark is a natural inhibitor of both the COX-2 and 5-lipoxygenase enzymes. Bioflavonoid-rich BerryVin™ provides additional support for cytokine balance and antioxidant activity.*

All Human Performance Specialists Formulas Meet or Exceed cGMP Quality Standards

BerryVin™ is a trademark of Cyvex Nutrition, Inc.

**Directions**

Take two capsules twice daily, or as directed by your healthcare practitioner.

Children, pregnant or lactating women, and individuals using blood thinners should consult their healthcare practitioner prior to use. Do not use if tamper seal is damaged.

**References**

**Does Not Contain**

Wheat, gluten, corn protein, yeast, soy, animal or dairy products, fish, shellfish, peanuts, tree nuts, egg, artificial colors, artificial sweeteners, or preservatives.
